

After photos of some patients of Dr Tavakoli who have undergone this procedure. Results may vary from person to person.

# BREAST AUGMENTATION SURGERY

Discover the importance of personalising your procedure.

Most Australian women seeking breast augmentation want to have natural-looking breasts. Modern-day breast augmentation can achieve this if tailored to the individual. Understanding and appreciating natural breast formation and shape, along with precise surgical techniques, are essential to achieve beautiful results. Dr Tavakoli is a breast augmentation specialist with several years experience. He identifies five essential factors for consideration when assessing breast enhancement surgery:

1. A woman's body build and height
2. Current breast size, shape and symmetry

3. Breast droopiness
4. Chest wall shape and dimensions
5. The patient's desired final breast shape and cup size.

Dr Tavakoli will assess and tailor each according to the individual and is why he has a huge success rate of happy clients.

Deciding to undergo breast augmentation surgery can be a big decision to make. It is important to research, understand and be comfortable with your decision before making your commitment to undergo surgery. To learn more visit: [www.drtaavakoli.com.au](http://www.drtaavakoli.com.au).
